DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The additive composition of line 2 is in conflict and lacks antecedent support from claim 1 which is directed to an additive component.

Claims 18-20 and 37-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation of claims 18 and 37 for the matrix material "includes an aliphatic acid component" is confusing and indefinite because it is unclear if the acid component is an additional component or if it is the matrix material. Clarification to the record is requested.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14, 16-18, 22-23, 25-29 and 44-47 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schuettenberg et al 4,639,255.

Schuettenberg teaches fuel additives comprising a polymeric material and at least one additive and further comprising other additives including release enhancers, a reinforcement component and a coating material surrounding a portion of the additive component and the matrix material, note in the entirety, particularly column 2, lines 3-17 and 60 to column 3, lines 1-18 and 33-68, column 5, line 55 to column 6, lines 1-2 and 35-51 and column 9, lines 46-52 and 64 to column 10, lines 1-3, examples I-IX and Table V, that anticipates the instant claims.

Claims 30-34, 40-41 and 43 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hudgens et al (Hudgens) 5,662,799.

Hudgens teaches an additive assembly comprising a housing comprising an inlet, an outlet an additive composition with an insoluble coating, see figures 1 and 2 for outlets 32, inlets 31, coolant permeable elements 39 coated with a polymeric material and insoluble in a fuel, column 5, lines 36-41 and 52-56.

Claims 15-17, 21, 35-36 and 42 appear to contain allowable subject matter.

The prior art cited but not relied upon further teaches containers, seal assemblies and methods comprising slow release additives.
